

Find Information on

Horticulture

@ your library

Step 1: Background information

You may need to look up background information or definitions of terms to help you understand your topic better. For other background sources, search the [Library catalogue](#).

<http://www.hort.net/gallery/>

A gallery of images online including 4,135 images and 2,028 plants (*as of July 1, 2007*).

Step 5 : Magazines and Scientific Articles

To find articles and current research about your topic, use a journal index online at the Guelph library website (see link below). A journal index is similar to the library catalogue. But instead of searching our collection of books in the catalogue, it searches a database where articles from magazines and journals are collected. **Look for the 'Get It' button or full-text link** to read articles online.

Start Here: Journal indexes – select Biology & Life Sciences

http://www.lib.uoguelph.ca/resources/journal_articles/

Agricola: a comprehensive index to agricultural and life sciences information. The primary focus is on the United States but there is international information as well.

Biological Sciences: an interdisciplinary database offering abstracts and citations to a wide range of research in biomedicine, biotechnology, zoology and ecology, and some aspects of agriculture and veterinary science.

CABDirect: provides international literature in agriculture, forestry, and allied disciplines, including: animal and crop husbandry, animal and plant breeding, plant protection, genetics, forestry engineering, economics, veterinary medicine, human nutrition and rural development.

Plant Science: contains citations and abstracts of scientific literature on plant science, focussing on all plant scientific aspects, especially pathology, symbiosis, biochemistry, genetics, biotechnology, techniques and environmental biology.

Step 6 : Searching the Internet

The term "public websites" refers to sites that can be freely reached through a search engine. Many of the links given above lead you to "invisible web sites" that the library pays for, such as journal databases. Typically, if your professor tells you not to use web sites on an assignment, they are referring to public web sites.

When searching, remember to try alternate words for your topic.

[Accessible Gardening for Therapeutic Horticulture](#)

Therapeutic Horticulture is the purposeful use of plants and plant-related activities to promote health and wellness for an

individual or group. This article contains information on creating an accessible garden and resources recommended by the Univ. of Minnesota for reading further.

Acta Horticulturae

This resource lists the tables of contents of the different volumes of this series. It does NOT include the full text of these volumes.
